November 2004

Dear valued Rex Customer:

**CAN/CSA-C802.2-00 - Minimum efficiency for Dry Type Transformer**

Starting January 1<sup>st</sup> 2005, Canada's *Energy Efficiency Regulations* will require that dry type transformers<sup>1</sup> meet a prescribe minimum efficiency performance standard.

Energy efficient *e-Rated*<sup>TM</sup> transformers are available from **Rex Power Magnetics**.

Any Dry Type Transformers manufactured after December 31<sup>st</sup> 2004 must meet or exceed the CAN/CSA-C802.2-00 regulation and be energy efficient.

**Rex Power Magnetics** can provide optional pricing for every Rex Dry Type Transformer that must meet this new energy efficiency standard.

Visit our website or contact us for more information on the implementation of this new standard.
